

Clinical Profile Of Patients Serviced

Amedisys services an elderly population with many poly-pharmacy needs, clinical co-morbidities and functional debilities. Detailed below are some key statistics regarding the company's patient population.

Amedisys' average age patient is 82 year olds. Twenty five percent of the population (the largest component) is between the age of 80 and 84 years old. The Company primarily provides care to the more senior Medicare recipient as opposed to the newly benefited eligible.
